

Chapter 17

hertalan easy.tex

hertalan easy.tex is a non-woven polyester separating layer 3mm thick weighing 300gr/m². ***hertalan*** easy.tex is supplied in rolls of approx 2m wide and in various lengths.

Scope

We recommend the use of ***hertalan*** easy.tex in the following situations:

- Where there is a risk of drum effect (vibration).
- To remove undulations from insulation.
- Where the substrate is uneven.
- Where the substrate has a low melting point bitumen (see chapter 6).

Application Method

Roll out the ***hertalan*** easy.tex longitudinally across the roof, ensure all laps are a minimum of 100mm.
